QUIZ# 6

For Loop Test

Civil War Beginning Date: 1861

Instruction:

Develope an 'HTML' Web document including JavaScripts to show a form/screen like the above utilizing a table with two columns of 'Civil War Beginning Date', as label, and a Text Input box. When clicking into the Input box (use onClick, event) the user is going to be prompted (use prompt, command) for the correct Date of the Civil War. The user has three chaces (use For loop) to enter the correct date. If the Date is correct, that is '1861', the user is going to get a popup window (use alert, command) of the correct entry (Saying 'Correct answer') with the correct answer placed into the Input box, otherwize the correct answer is going to be placed in the Input box, after the third time, as "answer is: 1861".

Use 'onClick' event for the Input box
Use 'break;' to get out of the For Loop
Use 'prompt' to ask 'what year did the Civil War begin?'
Use 'alert' method to for correct answer
